At AZEK® we engineer the best high-performance building materials available. Our commitment to technology, sustainability and innovation is at the heart of our brand. Premium materials, inspiring design and industry-leading warranties are why AZEK is #1 in Premium Decking.

# AZEK® — #1 in Premium Decking

## THE POWER OF SCIENCE AND TECHNOLOGY MAKES LIFE BETTER

We invest heavily in innovative research and development. Our polymer engineers have masterminded game-changing materials and continue to create the longest lasting products on the market.

## ENGINEERED FOR QUALITY AND BEAUTY

We believe trust is built with quality products. Our attention to beauty and detail is evidenced in our collection of inspired products, colors, and style options.

## CREATING PREMIUM PRODUCTS MEANS CREATING LASTING PRODUCTS

Our capped polymer and PVC performance materials resist scratches, stains, mold and mildew. Plus, we back your deck with an industry-leading 30-year limited fade and stain warranty and a limited lifetime warranty.

## ALLOY ARMOUR TECHNOLOGY®

Alloy Armour Technology (AAT) is a proprietary capping material made from an alloy blend. It provides improved performance characteristics, such as outstanding UV and weather protection, and keeps our decking resistant to mold, mildew, insect and moisture damage. Rigorously tested, AAT allows AZEK to confidently provide an industry-best 30-year limited fade and stain warranty.

# Best Benefits in the Industry

## INNOVATION AND SUSTAINABILITY

AZEK® Building Products' industry leadership is unparalleled. Materials science innovation has been at the core of our company since 2001. When you invest in our brands, you can feel confident you are selecting the best wood-alternatives on the market. Enjoy peace of mind knowing our high-performance AZEK decking includes recycled content, reducing waste sent to landfills. AZEK also does not use any virgin timber, saving tens of thousands of trees each year. To find out more, visit [AZEK.com/sustainability](https://www.azek.com/sustainability).

# 100% Smarter Than Wood™

Engineering beautiful, high-performance, low-maintenance outdoor building materials is at the core of what we do at AZEK® Building Products. When investing in your outdoor space, it's important to select materials that suit your lifestyle. Maintenance, care and upkeep can greatly impact the cost of your deck over time. You'll find, wood just can't compete.

## **BENEFITS OF CAPPED POLYMER: AZEK®**

With an enhanced real-wood look and strength backed by Alloy Armour Technology®, AZEK's capped polymer decking is best in quality and designed to endure. With AZEK, you'll get award-winning, sophisticated color palettes, matched with industry-leading warranties and a product that won't need staining or sealing for protection and will not splinter, rot, crack or warp.

## **BENEFITS OF CAPPED WOOD COMPOSITE: TimberTech® by AZEK Building Products**

Made from up to 73% recycled materials, including a composite of plastic and wood fibers, TimberTech is the sustainable choice and eliminates annual sealing and staining for protection. Plus, TimberTech's capped wood composite is protected on all four sides, providing long-lasting durability. It is also resistant to mold, mildew and moisture damage.

## **DISADVANTAGES OF WOOD**

Wood options can vary, but all have characteristics that should be considered before making the investment.

Pressure treated lumber, like pine, can fade quickly and requires frequent sanding and staining. While it appears to be more affordable upfront, it can actually exceed the cost of a composite deck over time. The price for Redwood and Cedar is growing as environmental conditions, like forest fires, contribute to declining supply. Exotic and tropical woods, like Ipe, contribute to deforestation and are not sustainable.

\*The product applications depicted in this brochure are for display purposes only and not for the purpose of validating the suitability, warrantability, or safety of any particular installation or application of the product. Always consult AZEK's Installation Instructions as well as local building codes to ensure proper installation.

# Mixing It Up

From custom color combinations to playful patterns and dynamic curved designs, AZEK® is as versatile as it is beautiful. Get inspired with these on-trend decking ideas.

TimberTech® Decking using:  
**TIGERWOOD, PECAN, & MOCHA** Legacy Collection with Impression Rail™

## MIX & MATCH

Make your project pop by selecting multiple deck colors and blending them throughout your space. We artfully craft some of our deck boards with cascading, or variegated, tones to mimic the look of real wood.

See more TimberTech® color options at [TimberTech.com](https://www.timbertech.com)

### VINTAGE

Rustic and rich, these vivid colors have a hearty texture that blend well for a refined, high-end look that is anything but reserved.

Top to Bottom: Cypress®, Dark Hickory, Mahogany

### ARBOR

Three vibrant tones that strike a cool contrast for a sophisticated, on-trend look that mimics many tropical and exotic hardwoods.

Top to Bottom: Brazilian Walnut, Hazelwood®, Silver Oak®

### HARVEST

A familiar, classic trio comprised of calming, warm neutrals. These work well with a variety of palettes for a tried-and-true color story.

Top to Bottom: Brownstone, Slate Gray, Autumn Chestnut®

### PATTERNS

Add a dash of drama by arranging your deck boards in a striking basketweave, chevron, or herringbone pattern. This is also a smart way to define and accentuate smaller areas within a larger space.

### CURVE APPEAL

Enhance the features of your fountain, pool or natural landscaping with rounded edges and fluid lines. The flexibility offered by state-of-the-art AZEK polymer materials makes curved decks and porches an easy look to achieve.

## GRAY TONES

Move away from basic browns and modernize your deck with any of AZEK's sophisticated, on-trend grays. This color group pairs well and pulls together contrasting textures and patterns.

SILVER OAK® Arbor Collection®

# Elegant Exteriors

AZEK applications are almost endless. Transform your home and add architectural interest by using AZEK® Deck as cladding or, extend your outdoor living space with a stunning rooftop oasis.

## CLADDING

Wrap your house in style with versatile AZEK Deck as cladding. Consider several complementary colors across the entire exterior or, apply several types of materials, one for each level of your home. These techniques can add interest and appeal, especially for resale.

Specific application and installation requirements apply, visit [AZEK.com/docs/installation/decking-cladding-install-guide.pdf](https://www.azek.com/docs/installation/decking-cladding-install-guide.pdf) for full details

**MAHOGANY** Vintage Collection®  
with Bronze Impression Rail™

**COASTLINE™** Vintage Collection®

## ROOFTOP RETREATS

Upgrade your home or condominium with an elevated rooftop oasis. AZEK® Deck's exclusive Alloy Armour Technology® stands up to extreme weather conditions.

**MAHOGANY** Vintage Collection® with Bronze Impression Rail™

When considering AZEK Deck in a rooftop application, it is important that the decking be attached to proper framing that is securely attached to the building and it should not be attached to a floating frame or substructure. Always consult the AZEK installation instructions as well as local building codes to ensure proper installation.

# Timeless Colors

## BOARD-TO-BOARD COLOR VARIATION:

At AZEK® we go to extensive lengths to make our products reflect all of the beauty and nuance of nature. Our collections include solid board colors, while others bear subtle to more pronounced highlights to closely resemble the characteristics of real wood. This intended effect is known as color variegation. To achieve this, we use various pigments and stains to replicate the features found in traditional lumber. The degree of variegation will vary from board-to-board and color to color.

## Vintage Collection®

Bring your outdoor living space to life with our most dramatic, variegated line. This sophisticated collection features the most natural looking colors with a subtle, low-gloss, wire-brushed visual appearance.

## Arbor Collection®

This popular collection includes warm, vibrant tones resembling rich woods from both near and far. These colors are moderately variegated and have slightly more pronounced grain patterns, similar to characteristics found in nature.

## Harvest Collection®

These classic colors offer a pleasing palette of soft shades to complement most popular home exteriors. Our least variegated line, the Harvest Collection has a traditional wood grain texture, with tried-and-true tones that blend well with a variety of architectural styles.

Please use the key below to understand the color styles presented on following pages.

**S** Solid Color  
A single color without discrete markings

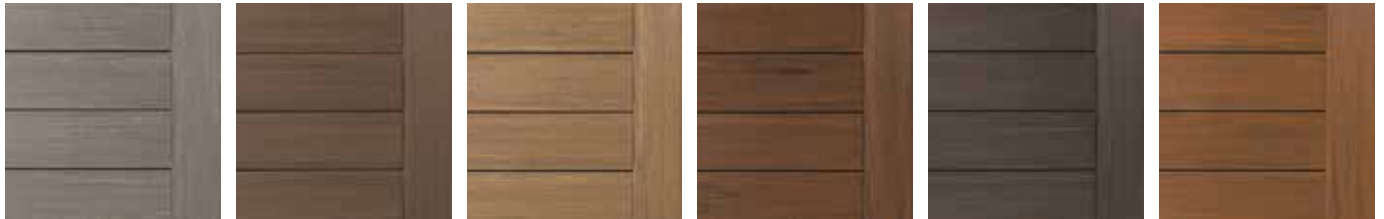

**V** Variegated Color  
Discrete markings of different colors

AZEK products are designed to resist fading. Depending on environmental conditions, colors may change over time, consistent with the warranty guarantees where applicable. For complete warranty information on decking products, visit [AZEK.com/warranty-and-care](https://www.azek.com/warranty-and-care).

<b>WEATHERED TEAK</b>		★	★

Porch Board

Although AZEK® Deck, Porch and Pavers products are cooler to the touch than many other deck board products, all decking products will get hot in the sun. Additionally, the darker the decking color, the hotter it will feel. For hotter climates, consider choosing a lighter color.

The product applications depicted in this brochure are for display purposes only and not for the purpose of validating the suitability, warrantability or safety of any particular installation or application of the product. Always consult the AZEK® installation instructions as well as local building codes to ensure proper installation.

# DrySpace

## AN UNDER-DECK WATER MANAGEMENT SYSTEM

DrySpace™ is made of solid extruded vinyl for maximum strength, durability, moisture and mold resistance. Creates additional space under a second-story deck into a dry, spacious patio.

# Pavers

## PAVERS, REINVENTED

Made from up to 95% post-consumer recycled materials, AZEK Pavers help projects earn LEED certification easier than any other pavement. AZEK Pavers outperform other pavers in LEED contribution, such as concrete pavers with fly ash, by more than 10 times.

AZEK Pavers use a patented grid system that dramatically reduces installation time and takes the frustration and difficulty out of manually setting and aligning heavy concrete pavers. AZEK Pavers are perfect for projects such as:

	Resurfacing	Standard	Permeable
<b>ROOFTOP PATIOS</b>	★	★	
<b>DECKS &amp; BALCONIES</b>	★		
<b>HIGH TRAFFIC ROOFTOPS</b>		★	
<b>GREEN ROOF WALKWAYS</b>	★	★	
<b>RESURFACE PATIOS &amp; WALKWAYS</b>	★		
<b>DRIVEWAYS &amp; PARKING LOTS</b>		★	★
<b>PATIOS &amp; WALKWAYS</b>		★	★
<b>PLAZAS &amp; ENTRANCES</b>		★	★
